(54) Title: **WEAPON GRIP ASSEMBLY**

(57) Abstract: A weapon grip assembly (16) for attachment to a forward portion of a weapon is provided. The invention includes a base assembly (20) supported for operative engagement by a handle (22). The base assembly includes clamps (24) adapted to be secured to a forward portion of the weapon and further includes a post (38) having a clamp end adapted to retain the clamps (24) for pivot motion with respect thereto. The post (38) of the base assembly (20) is received within a bore of the handle, a mandrel (32) being interposed between the handle (22) and the clamps (24) of the base assembly (20). As the base assembly (20) is drawn into the handle (22), by rotation of the handle (22) about the post (38) of the base assembly (20), the mandrel (32) receives the clamp end of the post (38), with an upper free surface thereof engaging the clamps for pivoted closure about a portion of the weapon in furtherance of securing the weapon grip assembly (16) thereto.
